SUBJECT: Letter sent to RECE from Venezuela by Luis POSADA Carriles.

SOURCE: **Augusto PINEDA** (mat. unk.).

SUB-SOURCE: **Aguedo LUGO** (mat. unk.).

1. On 22 May 1968 I-111 obtained the following information from **Augusto PINEDA** (mat. unk.).

2. On 19 May 1968 **PINEDA** was visited at home by **Aguedo LUGO** (mat. unk.) who had returned from a trip to Venezuela.

3. During their conversation, **LUGO** showed to **PINEDA** a photostatic copy of a letter which had been sent from Venezuela by Luis POSADA Carriles to **Augusto VALDES Miranda**, aka "Polo MIRANDA," a RECE leader. **LUGO** had delivered this letter to **VALDES Miranda** by hand.

4. At a moment when **LUGO** was not looking, **PINEDA** took the photostatic copy of this letter, which is attached to this report. In this letter POSADA mentioned the following matters:

a. The aid which had been given to the Association of Bay of Pigs Veterans (Brigade 2506) by the Venezuelan Army and the reasons why this aid was stopped.

b. Possibility of the Ministry of Defense and Ministry of Interior of becoming involved in a plan to help Cuban exiles fight against the Castro regime.

c. RECE should do everything possible so that RECE will be the Cuban exile organization to receive this aid (see preceding paragraph 4.b.), with POSADA offering to help RECE in this respect.

<p>1. Headquarters' request to review the contents of the attachment to Reference was received at a time when the Station was unable to produce current data to make a meaningful contribution to updating subject matter. Since receipt of Reference, the Station has <u>unilaterally recruited a telephone technician who is knowledgeable of SIFA telephone taps.</u> This Subject has not been used as yet, nor has he received his first months salary and <u>REXVIA is not yet prepared to probe Subject on SIFA taps.</u> With regard to DIGIPOL technical operations, the Station has only recently been able to obtain unilateral type information through <u>AMLEVI-13 who is only now getting to know the man in charge of the DIGIPOL telephone operation.</u></p> <p>2. Within the next two months the Station should be in a position to provide a more detailed and specific report on <u>COV</u> technical operations.</p> <p>3. The following is all the information currently available to the Station on <u>SIFA/DIGIPOL</u> technical operations.</p> <p>a. SIFA telephone taps are monitored in the building housing the Ministry of Communications, which is located alongside SIFA headquarters. According to the telephone technician, they have a capability to intercept 50 lines, but only a dozen are in operation at any given time. The monitoring section consists of 2-3 persons. Because of this personnel shortage many tapes are not replayed and even less are transcribed. SIFA offices in the interior have been reduced and it is doubtful that a telephone program is in operation.</p> <p>b. The DIGIPOL telephone intercepts are now directly under command of the Minister of Interior and all intercept requests must have his approval. According to CIGERO-1 in conversations with the COS, the former claims a telephone capability of 50 lines, not including 3-4 lines he has running directly into his office. (Plans call for completion of an additional 100 lines by the end of February 1968.) These are monitored in the building of Ministry of Interior. The staffing pattern, production and utilization of the taps is unknown to the Station. Since a capability of this extent involves running a cable to the monitoring post, it is most probable that the actual taps are on the frame at the main telephone exchange in Caracas.</p>

c. The Station is unaware of any capability of the GUY may have to place transmitters in telephones and it is doubtful that they have considered this type of operation during the past year.

d. A recent development, too early for the Station to report on as yet, is the formation of a Special Group under CIVISTA-5. It is known that CIVISTA-5 has been in the throes of developing a clandestine unit to run true intelligence type operations. In keeping with his plans he ordered a large amount of technical equipment from Germany. This equipment arrived on 14 February with one of his agents who had been receiving intelligence training in Germany. As yet the equipment has not been unpacked, but it is believed to contain material more of a photographic nature rather than audio type material. It is believed that CIVISTA-5 has also placed an order for audio equipment with a firm in the United States.

4. As can be seen from the above, the best GUY capability is to be found in the telephone intercept program, and as has been indicated, the Station will have much better information on this and other technical operations within the next few months.
