

SECRET

6 February 1997

MEMORANDUM FOR: Fred Wickham
DO Focal Point for JFK Board

FROM: J. Barry Harrelson
DCI/CSI/HRG, JFK Project Officer

SUBJECT: ARRB Request for Additional Information
and Records No. CIA-7

REFERENCE: ARRB Memo dtd 8 Nov 95, same subj,
sub-para (2), The Mexico City Station
(attached)

1. In his review of the history of the Mexico City Station, Jeremy Gunn, ARRB Staff, cited the five footnotes annotated below as possible assassination-related records and requested copies of the source documents. For your assistance in identifying the documents, following the footnote citation is the text (in italics) to which it refers.

Footnote 39. HMMA-17494, 4 Aug 61, sub: Data on Case Officer work and Operational Projects at the Mexico City Station, WH/HO.

pg 38/39, Vol I. "The Cuban task force and related activities caused an increase in the Mexico City Station to 76 Americans (40 were located inside the Embassy using official cover, and 36 were outside under nonofficial cover.) Indigenous agents numbered over 200."

Footnote 55. Ibid. (Ft. 54. ISTHMUS No. 62, 6 Dec 63, WH/HO.)

pg 44, Vol I. "Later in the year Diaz became the PRI candidate (tantamount to election) which assured LIENVOY of an extended six years under virtually the same management." (54)

"In 1963 the routine reporting of an operational lead by LIENVOY developed into a long investigation. A man with a US accent, speaking broken Russian, telephoned both the Soviet and Cuban Embassssies on 26 September and 6 October 1963. He identified himself as Lee Oswald and Harvey Oswald.

SECRET

SECRET

This information was cabled to Headquarters for traces and identifying data. After the assassination of President Kennedy on 22 November 1963 in Dallas, Texas, the Mexico City Station spent several months investigating leads in connection with Oswald's visit to Mexico. (55)"

Footnote 61. I&R Report, Dec 64, 185215 TS.

pg 47/48, Vol I. "A team from the Inspection and Review (I&R) Staff at Headquarters conducted a thorough review of the Mexico City Station administrative and operational program in July 1964. They wrote: 'The Mexico City Station approaches the classic type station in opportunities and in operations.' It had high-level liaison operations, unilateral operations, and joint operations with the host government, as well as Soviet, Satellite, Cuban, and indigenous Communist Party operations. There was local collaborative liaison with other US agencies (the State Department, the FBI, the Immigration and Naturalization Service (I&NS), and the military attaches). To accomplish this wide range of tasks, the station was organized into Soviet, Cuban, Satellite, Covert Action, Communist Party, and Operational Support Branches. The last branch was an operational catch-all responsible for direction of all technical, surveillance, and liaison operations. In reality, operational support operations were an extension of the chief of station's personal clandestine capabilities, particularly those projects involving Mexican officials. (61)"

Footnote No. 139. ISTHMUS No. 29, 8 Mar 61, WH/HO.

pg 229, Vol II. "During February 1961, the first transmitter was installed in the office of the Cuban Ambassador to Mexico." (139)"

"*Between 1961 and 1968, at least a dozen audio installations were made in Cuban installations and residences, but all of them eventually failed. LI-ROMANCE and LISAMPAN are two projects which provided for short-term multiple audio installations."

Footnote No. 190. Project LILINK, File Nos. 201-226902 and 50-6-99/1, Job No. 68-494/28, Space 60793.

pg 353 Vol II. "LILINK"
