FROM INFO	Chief of Base, Salzburg <i>O</i> REMOTE/LCMSGTY-1/ARMCOMPA-1 Sergeant PERSHILIN	SEARCHED NO	INDEXED NO MARKED FOR INDEXING NO INDEXING REQUIRED
ACTION HQ. INFO	Vienna, please make appropriate number of prints from attached negative.		
		AM	INDEXING CAN BE JUDGED BY QUALIFIED HQ. DEM ONLY

- a. EAVI-10664, 23 May 1961
 b. EAVI-21253, 19 July 1961 (not to Germany or Paris)
 c. EAVI-1495, 7 August 1961 "
 d. EAVI-23354, 4 October 1961 "

1. References b., c. and d. contain Vienna's instructions to Salzburg regarding identifying Subject; our initial reply stating there was no information in UNR files; and Vienna's permission to run **unilateral police** traces through **GARYTGY-1**, respectively.

2. **GARYTGY-1**'s initial report (received on 31 October 1961) states that

Sergeant PERSHILIN - born 2 February 1910 in Oberkassy/Rivne, married, teacher, Ukrainian citizen, resided at the refugee camp in Steiermark, Salzburg, from 13 July 1950 to 23 August 1950. Prior to 13 July 1950 he lived at the Hellbrunn refugee camp in Salzburg. According to police records Subject left Salzburg for the United States on 23 August 1950.

3. Additional information in the form of a photographic copy of the official police registration card and a negative of an identification photograph of Subject, both dated 7 November 1947 reveals that

Sergeant PERSHILIN - born 2 February 1910 in Przysyl, is a Polish citizen, married, teacher, 175 cm tall, gray eyes, blond hair, oval face, no prominent or identifying features.

The date on the registration card presumably indicates the date on which Subject was first officially registered by the Salzburg police.

4. We are returning to Vienna the photograph sent us under reference b. for their retention. We have also attached the identification negative noted in the preceding paragraph. Would Vienna please make prints for AM and Paris and attach them to their copies of this dispatch.

MAXWELL E. UTTALDNER

SUBJECT: Semen Spiridon POGORILIJ also known as Semen POGORILIV
Internal Security - R

1. Reference is made to previous correspondence from this office regarding the Subject and to your file number 105-FB295.

2. An official French liaison source reported in early September 1961 that Antin NYCZPGRUE received a letter with the return address: (fmu) DIALNAWSKY, 63/W. 7 St. (sic) Philadelphia 23, Pa. The address was also received from an official U.S. source as 13/W 7 St. but this is believed to be a typographical error. It has not been possible to verify the address as the envelope was not photographed but was passed routinely from the post office to NYCZPGRUE. The letter was not tested for secret writing.

3. The files of this Agency contain no identifiable information on DIALNAWSKY. It is possible the address should be 631 North Seventh Street, Philadelphia, which is the one used by POGORILIV. According to information from your Bureau, this is the home of Dmytro WASYLAKOW, Secretary of the Ukrainian Workingmen's Association and the residence may be used for meetings of that organization.

4. We would appreciate any information in your files on DIALNAWSKY.

FROM: Deputy Director, Plans

SUBJECT: Serum POWDERLINE

1. Representatives of the FBI Laboratory have been previously briefed on the KEMOTE TEST which we believed had been used when working on the MCMLILLY letter and which established the presence of S. on the letter.

2. We have now been advised by a field representative that a modified version of this process was actually used and it is possible that the S. is detectable by this version of the test, but not by the regular test of which your Bureau has the details.

3. It should be noted that our work on known systems revealed two cases exhibiting the same type of floating detection as was noted on the MCMLILLY letter. This, of course, does not mean that the MCMLILLY letter is written in one of these systems, but merely that floating detections can occasionally be expected with this variation of the KEMOTE TEST.

4. Agency headquarters laboratory has not completed a comparison of the original and modified KEMOTE procedures so as to confirm the finding of our field laboratory that the modified test is more sensitive. It is being provided to your Bureau at this time, however, since it is a technique which has been used successfully in a current case.

ROUTINE : RUEFOO/LCDEPROFE/ANLOGA/1

ACTION REQUESTS : Show photograph to appropriate sources

REFERENCE : 1. Attached is a photograph of Semyon POGORILYU, which we would like shown, without name, to appropriate unilateral sources for possible identification.

2. PYI: POGORILYU's name appears as the sender of a letter containing secret writing to Austin SHCHYPONUK in Paris, France. The letter was sent in care of Dzytro (SYT), another Ukrainian resident of Paris. SYT, in November 1960, asked AEDCO/1 to deliver the letter to SHCHYPONUK who was confined to a mental sanitarium near Paris. SYT told AEDCO/1 that he (SYT) and SHCHYPONUK had been involved with Vasiliy MAKASHKO (Soviet assigned to UNRCA and the case officer of the arrested emigre Grigory BULGAKOV), and therefore SYT feared coming to the attention of the French police by delivering the letters to SHCHYPONUK.

NYCPA analysis revealed the presence of the s/v in the letter from POGORILYU, but failed in attempts to develop the s/v. COMINT and Paris Station are now investigating this case; therefore, in your reply please send an information copy to Paris.

3. The following is biographic information on Semyon POGORILYU.

a. dob: 2 February 1910
 b. pob: Chernay, Ukraine
 c. parents: Spiridon and Alexandra nee INCHIKO POGORILYU
 d. education: seven years elementary school and one year teachers' school
 e. residence: USSR: 1924 to 1943
 Poland 1943 and 1944
 Czechoslovakia 1944 and 1945

MEMORANDUM FOR: Director
Federal Bureau of Investigation

SUBJECT: Semen Spiridon POBORULIJ aka POBORILIJ
Internal Security - R

1. Reference is made to memorandum from this office, CSC-3/704,636 of 24 April 1961, and to your memorandum of 3 May 1961, file number 105-93295.
 2. As reported in referenced CSC memorandum, a letter purportedly from Subject was tested for secret writing. Secret writing was seen by one technician and its presence confirmed by another technician. However, the message had disappeared before a third technician could observe it. The technician who tested the letter has said that only one line of hand-printed secret writing was distinctly visible. There were traces of S/W on other parts of the letter but this was very indistinct. The cover letter was in longhand. The disappearance of the writing did not permit photography or recording of any part of the S/W message.

SUBJECT: Semen POSORILIW
Internal Security - B

1. Reference is made to your memorandum of 26 February 1961 on Subject.

2. We plan to discuss **with French liaison** the receipt by Daytro GNTP and Antin NYCLYPCHUK of the letter containing secret writing from Subject, who will be identified **to the French** only as a resident of the United States. We believe such a discussion is desirable in view of its pertinence to the current investigation of the intelligence activities of Vasilii MYAKHAMED (member of the Soviet delegation to UNESCO from April 1957 to August 1960). If such a discussion would adversely affect your interest in POSORILIW, please advise us as soon as possible.

24 APR 1961

TO: Director
Federal Bureau of Investigation
Attention: Mr. S. J. Papich

FROM: Deputy Director (Plans)

SUBJECT: Svenn POGORILIV 401-289249
Internal Security - R

1. Reference is made to the following correspondence:

- a. Bureau report of 14 February 1961, made at Philadelphia, Pennsylvania, and Subject as above;
- b. Memorandum from Deputy Director (Plans), Subject as above, dated 9 January 1961, and numbered CSCl - 3/763,211;
- c. CIA Teletype, Subject as above, dated 16 November 1960;
- d. CIA Teletype, Subject as above, dated 17 February 1961.

2. We would appreciate being informed whether or not you have had an opportunity to compare the hand writing of Svenn POGORILIV and that of the letter bearing his name and address, which we sent to you with reference 1.b..

3. In a review of our files we note that the lack of elaboration in our earlier correspondence might cause your Bureau some difficulty. Our statement in reference 1.c. that the PGORILIV letter bore indications of secret writing was based on the findings of our technical staff. One of our technicians applied a test that permitted him to see writing which, although it was not legible, could be seen to be other than that of the overt text. This writing remained visible long enough for another technician

CS COPY

401-289249

to confirm its presence. There have been reports that our source is considered by the Soviets to be American controlled. Thus it was considered that, if this letter were a Soviet intelligence communication, it was likely the Soviets would consider the operation compromised when our source's possession of the letter was reported. For this reason, we decided it was best to forge a copy of the POSORILIW letter [and make every attempt to develop any secret writing it contained. Unfortunately, we were unable to do so, and the original letter was destroyed in the process.] As we reported in reference I.d. on 8 or 9 January 1961 our source delivered to Antin NYCYZPOSIK the forged copy of the POSORILIW letter. To date there has been no report of any reaction to NYCYZPOSIK's receipt of the forgery.

Attachment to DIA-15927
dated 22 November 1960

SUBJECT: Report on Testing of Letters for SW

REFS: (1) DIA-59270, 4 November 1960
(2) DIA-15911, 8 November 1960
(3) DIA 7329

1. The purpose of this report is summarize the laboratory work done on two letters transmitted to us originally as attachments to Reference #1. For identification purposes in this report we shall refer to the letter postmarked in Philadelphia as Letter #1 and the one postmarked in the USSR as Letter #2.

2. In order to facilitate a better understanding of the results some interpretative data on the tests performed is included.

3. Because of the requirement that the letters be left in good condition to permit their delivery to the addressee, the initial examination consisted of the customary visual and U.V. inspection (including long wave and short wave), and the so-called KEMFOLE test. This latter test has only recently been introduced and constitutes the most formidable test known to us against SW. It was by means of this test that the presence of SW in Letter #1 became apparent. In the application of this test a portion of the SW is actually physically lifted from the item being tested and subsequently through a process involving both chemical and physical reactions, the SW is made visible. The degree of visibility varies from completely negative results to completely legible ones. According to the technician who performed this test the results obtained with Letter #1 were not quite legible, but definite enough to permit checking to establish that they were not due to the visible ink of the letter. The time interval during which this particular detection is observable lasts but a few minutes which the technician used to verify that he was detecting SW and not visible text. By the time he called in his two colleagues the reaction had progressed to the point that only one of these technicians was able to observe the SW. Thus the operator and one other technician saw the SW.

4. At this point the letters were returned to Paris with Reference #2 which reported "definite traces of SW" in Letter #1.

5. Before giving an account of the work done during the second phase of the investigation, (i.e., after the letters were returned to the laboratory for development) it should be pointed out that the KEMFOLE test, though an extremely effective test for the detection of SW, does not identify the system involved. Complete development of the secret message under these circumstances would have been almost impossible. The only alternative available to the chemist, and the one he followed in this particular case, is to proceed with a series of chemical tests applied directly to the document under investigation. These tests are applied in sequence, one after the other, each requiring for its execution that a portion of the page be sacrificed. It is therefore important that those tests affording the greatest probability of developing the SW be applied first; thus if and when, a test is found capable of developing the ink, the remainder of the page (i.e., the portion not affected by previous chemical applications) is treated with it.

S E C R E T
K A P O KPage 2 of Attachment to
DDA-19927 (cc:
cc-no-4-17-1960)

SUBJECT: Report on Testing of Letters for SF

Concluded

5. In testing letter #1, the analyst chose to apply those tests known to be effective in developing known substances (there are, however, FBI inks for which we have no known development). After such tests were exhausted without yielding any detection the analyst proceeded with the application of other tests. In all a total of 10 different chemical reagents were applied. No significant materials could be recovered here even though the letter was highly acidic.

7. None of these results yielded even a trace of SF. These results appear to contradict the report initially sent with reference #2. This should not be so interpreted. We still believe that Elmer H. Hubbard SF, our failure to develop it notwithstanding.

8. As previously reported, letter #2 was not treated, for reasons given in reference #1. A facsimile of Letter #1 was made before subject taking its chemical treatment. The facsimile was checked by a competent linguist and authentication specialist and found satisfactory.

9. FBI: Any information concerning the UNIPOL test, indicating its existence, is considered extremely sensitive and should be so treated.

FROM : Chief of Station, GERMANY		DATE	8 November 1960
SUBJECT : AQUATIC/REINHOLD/Operational Examination of Letters for Secret Writing		RE 743-3 - 10-66E TX-BND	
ACTION REQUIRED		MARKED FOR INDEXING	
		NO INDEXING REQUIRED	
		INDEXING CAN BE JUDGED BY QUALIFIED HQ DESK ONLY	
REFERENCES:			

OPPA-55220 dated 4 November 1960

1. The letters transmitted with the above reference have been covertly tested for the presence of secret writing.

2. The letter postmarked from USSR revealed no evidence of secret writing. The letter postmarked Philadelphia had definite traces of secret writing, however, because of the nature of the requirements no attempt was made to develop or identify the secret writing.

3. The letters are herewith returned, sealed, for integration in the mails for sending to the addressee.

DATE

ROUTING General: AQUATIC/REINHOLD/Operational
SPECIFIC Testing letters for possible secret writing:

RE-FILE - CHECK X ONE

MARKED FOR INDEXING

ACTION REQ'D
See below

X NO INDEXING REQ'D

INDEXING CAN BE JUDGED
BY QUALIFIED HQ DESK ONLY**REFERENCE**

1. MURIOZ/Paris requests that the attached letters be examined for secret writing. These letters have **been opened by a REINHOLD agent** and photographed by the Paris Station. It is possible that these letters contain SW and SW traps.

2. MTOFAL technicians should keep in mind that these letters have to be **PAKED/SHED** returned in the 9 PAKED November pouch, as the letters have to be integrated in the mail system and sent to the addressee **without his knowledge that these letters have been tampered with** on the eleventh or twelfth November. If the work cannot possibly be done the letters should be sealed and returned untested.

MEMORANDUM FOR: CI/DO/SOV/SAT

From: SR/2/CE/Rita L. Perkins

Subject: Outline Communication re PONORILIW Case

1. OPPA 55220, 4 November 1960
Request to METOPAZ to analyze letters
2. EDTA 15911, 8 November 1960
METOPAZ reply that PONORILIW letter bore definite traces of S/w.
3. PARI 2339, 10 November 1960
PARI STA informed Hqs of AEDOQMA/1 receipt of letters, relay to METOPAZ, latter's reply, and asked for guidance
4. OUT 92770, 16 November 1960
INFO PARI 2339 relayed to FBI; long delay in informing FBI because cable came in on Thurs evening and not given to c/o until 14 Nov. Dr. REED consulted 14 Nov re the wording "definite traces" and advised could not elaborate until METOPAZ report came in.
5. OUT 92118, 14 November 1960 To Pari
Stated HQS opinion prime concern was to determine if PONORILIW involved RIS and directed PARI to return letters to METOPAZ and that the latter attempt to develop the S/W.
6. OPPA 55369, 16 November 1960
PARI returned letters to METOPAZ per para 5 above.
7. 7. PARI 2426, 18 November 1960
Refed 6 above; directed METOPAZ to make forged copy of PONORILIW letter and then attempt develop S/W
7. 8. FRAN 7364, 18 November 1960
METOPAZ reminds PARI letters will be destroyed in development attempts
Holding action till Pari advises.
9. FRAN 7388, 19 November 1960
METOPAZ reports efforts to develop S/W failed.
10. EDTA 15915, 20 November 1960
METOPAZ returned letters to PARI; full report on examination will follow.
11. EDTA 15927, 22 November 1960
METOPAZ report in full. My copy does not indicate date arrived in HQS, but believe c. 1 December; at this time in telephone communication with IR. REED who advised S/W detection made by new sensitive method, that FBI lab aware of this method, and he would be responsible for relaying this info to FBI.
